

5 January 2012

**Eruma plc ('Eruma' or 'the Company')**  
**Illuminex Lighting Contract Wins with a Police Authority**

Eruma plc, the AIM traded specialist provider of counter terrorism, intruder prevention products and intelligent lighting, is pleased to announce that it has won a further contract with a Police Authority totalling over £325,000 through its Illuminex lighting division.

Within the last year, Eruma has won a total of £495,355 business with this client assisted by the Company's partnership with Concept Energy Solutions.

Eruma Chairman David Alexander said, "I am delighted that the relationship we have with Concept Energy has developed into repeat business. Illuminex represents a key growth opportunity for the Company and our continued working partnership with Concept Energy and their customer base will provide excellent reference sites for us and we anticipate that sales of our lighting systems will gain further momentum during 2012."

**Notes**

Eruma plc is an AIM traded specialist provider of counter terrorism, intruder prevention products and intelligent lighting. It has two divisions - Security Blinds and Illuminex.

Security Blinds is a leading manufacturer of physical security and protection systems in the UK. Servicing both the public and commercial sectors, the patented Secur™ system provides clients with protection against theft and forced entry. It also gives businesses and institutions the opportunity to take proactive steps to address the modern threat of terrorism having met stringent testing requirements to win endorsement by the Home Office, Association of Chief Police Officers, leading banks, and local authorities through its ability to protect people, property and equipment from bomb blasts.

Illuminex is a supplier and distributor of intelligent lighting systems, providing superior performance whilst reducing costs to businesses through reductions in energy consumption and maintenance overhead. Through using its systems, an organisation's environmental impact and carbon footprint can be significantly reduced, enabling them to seek government funding and loans to implement these solutions.
