Eruma plc ('Eruma' or 'the Company')
Anti Ram Raid Gate Update

Eruma plc, the AIM traded specialist provider of counter terrorism, intruder prevention products and intelligent lighting, is pleased to provide an update on the progress of the latest Security Blind product; the Anti Ram Raid Gate. The rising volume of ram raid intrusions makes the Anti Ram Raid Gate ideal for warehousing and distribution units that contain high value assets and in addition to reducing thefts, it reduces damage inflicted on the storage unit itself.

Uptake for the gates, which sell for an average of £5,000 per unit, has been high and a number of clients have received positive feedback when negotiating their insurance. Security Blinds has taken an initial order for five sites from one of the UK's leading plumbing and heating merchants in the UK with over 300 branches nationwide.

Furthermore, City Link, the UK's premium express delivery company with numerous distribution units of critical value, has completed an initial installation of the product, with the potential for further installations.

City Link Security Compliance General Manager Ken Semple commented, "We are always looking for cost effective and easy to use successful security products. The Anti Ram Raid Gate not only protects against ram-raids but also burglary via shutter doors. It is highly effective and its simple design means that it can be deployed in a safe and easy manner within seconds and by just one person. I would recommend this product to anybody who needs to protect a shutter door."

Eruma Chairman David Alexander said, "Having only recently been launched, we have been pleased with uptake of the Anti Ram Raid Gate. A number of high profile businesses have already installed the gates and response has been positive. In addition we have a solid pipeline of businesses that have expressed an interest and with this in mind I look forward to providing an update on the progress of the Anti Ram Raid Gate."

Notes to Editors:

Incorporated in March 2005 and listed on AIM, Eruma plc is the holding company for Illuminex Ltd and Security Blinds Ltd.

Illuminex Ltd is a supplier and distributor of intelligent lighting systems. Illuminex solid state systems provide superior performance whilst reducing costs to businesses through reductions in energy consumption and maintenance overhead. This drives a significant reduction of an organisations impact on the environment through reducing an organisations carbon footprint, which enables them to seeking government funding and loans to implement these solutions.

Security Blinds Ltd is a leading manufacturer of physical security and protection systems in the UK. Servicing both the public and commercial sectors, the patented Secur™ system provides clients with protection against theft and forced entry. The system also gives businesses and institutions the opportunity to take proactive steps to address the modern threat of terrorism; having met stringent testing requirements to win endorsement by the Home Office, Association of Chief Police Officers, leading banks, and local authorities through its ability to protect people, property and equipment from bomb blasts.

Launched in 2009, Security Blinds Ltd also produces the unique Anti Ram Raid Gate. This gate is installed behind roller shutters to protect against ram raids: Anchored to the inside of the building the retractable barrier resists being rammed by vehicles – including lorries – and will prevent roller shutters from being forced open by jacks or breached by angle grinders used by determined thieves.
