Notes

Incorporated in March 2005 and listed on AIM, Eruma plc is the holding company for Illuminex Ltd and Security Blinds Ltd.

Security Blinds Ltd is a leading manufacturer of physical security and protection systems in the UK. Servicing both the public and commercial sectors, the patented Secur™ system provides clients with protection against theft and forced entry. The system also gives businesses and institutions the opportunity to take proactive steps to address the modern threat of terrorism; having met stringent testing requirements to win endorsement by the Home Office, Association of Chief Police Officers, leading banks, and local authorities through its ability to protect people, property and equipment from bomb blasts.

Launched in 2009, Security Blinds Ltd also produces the Anti Ram Raid Gate. This gate is installed behind roller shutters to protect against ram raids. Anchored to the inside of the building the retractable barrier resists being rammed by vehicles, including lorries, and will deter roller shutters from being forced open by jacks or breached by angle grinders used by determined thieves.

Illuminex Ltd is a supplier and distributor of intelligent lighting systems. Illuminex solid state systems provide superior performance whilst reducing costs to businesses through reductions in energy consumption and maintenance overhead. This drives a significant reduction of an organisation's impact on the environment through reducing

an organisation's carbon footprint, which enables them to seek government funding and loans to implement these solutions.
