**Eruma plc ('Eruma' or 'the Company')**  
**Contract Win in Lebanon, Middle East**

Eruma plc, the AIM traded specialist provider of counter terrorism, intruder prevention products and intelligent lighting, has won a significant contract through its wholly owned subsidiary, Security Blinds Ltd ('Security Blinds'), to install Secur™ security blinds at a major international organisation in the Middle East. The contract is worth US\$192,898 and will provide enhanced bomb-blast protection for a secure and prestigious facility in Beirut, Lebanon.

The Secur™ product is an ideal solution for counter terrorism due to the high level of protection it provides buildings to mitigate the effects of a bomb blast. In addition to protecting the windows themselves, the occupants and contents, Secur™ is also effective against intruders.

Eruma Chief Executive Wayne Money said, "Following on from our recent £380,000 contract win with Bristol Airport for energy efficient lighting systems, this deal demonstrates the renewed success of Eruma's sales strategy. In two deals we have secured over half a million pounds of revenue and we are delighted that our two trading entities, Security Blinds and Illuminex, are in a position to commandeer these major contract wins. Indeed, we have installed Secur™ in a variety of establishments, including premises occupied by the UK police force, where protection of life and critical infrastructure are paramount to maintaining national and regional security."

**Notes to Editors:**

Incorporated in March 2005 and listed on AIM, Eruma plc is the holding company for Illuminex Ltd and Security Blinds Ltd.

**Illuminex Ltd** is a supplier and distributor of intelligent lighting systems. Illuminex solid state systems provide superior performance whilst reducing costs to businesses through reductions in energy consumption and maintenance overhead. This drives a

significant reduction of an organisation's impact on the environment through reducing an organisation's carbon footprint, which enables them to seek government funding and loans to implement these solutions.

**Security Blinds Ltd** is a leading manufacturer of physical security and protection systems in the UK. Servicing both the public and commercial sectors, the patented Secur™ system provides clients with protection against theft and forced entry. The system also gives businesses and institutions the opportunity to take proactive steps to address the modern threat of terrorism; having met stringent testing requirements to win endorsement by the Home Office, Association of Chief Police Officers, leading banks, and local authorities through its ability to protect people, property and equipment from bomb blasts.

Launched in 2009, Security Blinds Ltd also produces the Anti Ram Raid Gate. This gate is installed behind roller shutters to protect against ram raids. Anchored to the inside of the building the retractable barrier resists being rammed by vehicles, including lorries, and will deter roller shutters from being forced open by jacks or breached by angle grinders used by determined thieves.
